

Critical Infrastructure Protection & Security

Wireless Mobility Solutions

- Citywide wireless mesh
- Wireless video surveillance
- Wireless asset tracking – RFID
- Streaming video to patrol cars
- Wireless voice
- Wireless traffic signs
- Wireless automated meter reading
- Encrypted wireless solutions and FIPS 140-2

Surveillance

CCTV

- Utilizes Mega Pixel, IR, Thermal, Fixed and PTZ
- Configuration available for local image storage and management or as enterprise systems
- Remote, secure video monitoring and camera control. Can utilize web-enabled PDA's, laptops, etc.

Video Analytics

- Situational awareness software
- Detection, assessment and forensics- Intelligent video
- Video management system

Radar

- Land-and marine based solutions
- Threat detection and assessment, vessel identification and management and video/radar integration

Access Control

- Secure single door stand alone systems and multiple door/multiple site configurations
- Control access to doors, gates, warehouses and elevators using a combination of keypads, proximity readers, smart-card technology and biometric readers
- Video wall technology
- Command post build outs

Mass Notifications and Emergency Communications

Advanced Notification Speaker Solution

- Clear and intelligible sound beyond one mile
- Communicate to thousands of people from single point
- Hand held and stand mounting available
- Long throw planar magnetic speaker technology

Mobile Device Emergency Notifications

- Organization wide communications through Microsoft enabled mobile devices
- Automates contact management
- Houses mandatory contact lists
- Access control lists
- Interconnects various devices such as cell phones, wired phones, pagers, SMS devices, and fax machines
- Secure, reliable, web-based, two-way communication and alert/reporting system
- Collect and store information that documents the entire process, giving a complete, detailed record of events

Command and Control

- Integration of all physical security technologies into a unified command and control structure
- The unified structure can also be provided as a single web-portal for ease of use and information distribution
- These structures may include C2, C3, and C4i

Intrusion Detection

- Perimeter security options using microwave technology
- Video analytics
- Monitored fencing
- Hard-wired solutions
- Motion sensors
- Wireless detection devices
- Alarm systems utilizing traditional door/window contacts

Intelligent Decisions has been awarded and deployed numerous security and safety solutions across the DoD, Intelligence and First Responder communities. These systems ensure the protection of our nation's critical infrastructure, national security objectives and increase public security and safety. Our customer base includes classified government customers, state and local governments as well as Department of Defense (DoD) components. ID provides Operations and Maintenance (O&M) support over the system life-cycle, in addition to integration capabilities exceeding the evolving compliance requirements facing the DoD, Intelligence, law enforcement and First Responder communities.

Company Overview

Intelligent Decisions (ID) is a unique, diversified Information Technology solutions provider helping defense, intelligence and civilian organizations meet their technology requirements and achieve mission critical goals.

For over 20 years, ID has been solving the industry's most challenging IT problems by utilizing technology expertise and past successes while capitalizing on our employees' innovative approach to solutions. The value that we bring to our customers is simple- we integrate the most sophisticated technology in the market with high-end consultative services to provide you with an all-encompassing, end-to-end solution.

Company Highlights

- Headquarters is located outside of the nation's capital with offices throughout the U.S.
- Business focus in innovative IT product solutions and professional IT engineering solutions
- ISO 9001:2000 registered
- 50,000 sq/ft integration facility
- In-house advanced technology test lab
- Strong, established presence with federal agencies
- Significant contract access
- Recognized for outstanding business performance by VARBusiness 500, CRN's Fast Growth 100 and Inc. 5000
- Facility clearance
- Small business qualifications

Federal Contract Vehicles

All federal, state and local governments can take advantage of our robust list of contract vehicles surrounding numerous innovative technology products, services and solutions. These include Blanket Purchase Agreements (BPAs), Indefinite Delivery Indefinite Quantity (IDIQs), Government Wide Acquisitions Contracts (GWACs) and we have our own GSA Schedule. Our widely known and often used contract vehicles include: SEWP IV, US Courts, FBI PITO/TRP, Department of Commerce/USPTO, SmartBUY/ESI (DAR), NIH, ECS III, SeaPort-e and GSA BPA.

5 Core Capabilities
